I benefit a great deal from XM service. One of the services I've grown fond of is the ability to get the traffic in my area in seconds. This is much better than waiting 30 minutes to an 1 hour listening to regular radio to a short 5 second tidbit that I may accidently miss. With XM traffic I know which roads to aviod even before I leave my driveway. Do not take XM traffic away!!!!!!! I pay for the service, therefore I should be able to listen to what I want! The day XM is free to everyone, is the day that you can dictate what is on XM. Let the consumer decide what should happen, not big brother!
Thank you for reading my comments,
